

Mathieu GOLOS

Data Scientist

Data scientist and neuroscientist, passionate about applying machine learning and data analysis to solve a wide range of complex problems, and always eager to explore new challenges. Can work independently and thrive within a multidisciplinary team.

Skills

Programming

Python, SQL, Matlab, Shell

Machine Learning

Scikit-learn, PyTorch, Keras, TensorFlow, XGBoost, LightGBM, Classification, Regression, Ensembles

Data Manipulation

NumPy, Pandas, Vaex, Arrow

Natural Language Processing

NLTK, spaCy, LLM, RAG, Agent, HuggingFace Transformers,

Infrastructure & Ops

Scaleway, OVH, Azure, AWS, GCP, Kubernetes, Git Actions, Prefect, MLflow, WandB

Web & API

Streamlit, FastAPI, REST API, Flask, Django, Webscraping

Environments

Windows, Linux, VS Code, Git, Gitlab, Docker, CI/CD

Databases

Dask, PySpark, PostgreSQL, MongoDB, MySQL, Excel

Reporting & Project mngmt.

Power BI, Matplotlib, Seaborn, Plotly, Folium, Tableau, Office, Jira, Notion, Agilité

Languages

French, English (bilingual), Spanish (basic)

Soft Skills

Critical thinking, Rigorous, Sociability, Intuition, Flexibility, Autonomous

Professional Experience

- 2025/02 - ... **Data Scientist, RefraSense (Lille, France, remote)**
Identification and analysis of needs for research, optimization, and deployment with scaling of predictive models in ophthalmology. Full development of an intelligent solution for automated prescription of glasses. Clinical validation and significant reduction in consultation time for patients and healthcare professionals.
- 2023 - 2024 **Data Scientist, Jagger & Lewis (Lille)**
Recognition of canine behavior through processing and prediction from smart sensors for animal welfare. Design and deployment of solutions. Data management, pipelines, and feature engineering. Algorithm, pipeline, and API optimization and adjustment for Edge computing.
- 2023/02-04 **Clinical Data Scientist, Lindera (Italy & Germany, remote)**
Intermediary between clinical and data science teams to develop a medical tool. Transformation and cleaning of form data.
- 2022/03-11 **Data Scientist, XRator (France & Vietnam, remote)**
Improvement of cyber risk management through data analysis and management and development of information extraction tools. Study, cleaning, management, and analysis of data to identify gaps and quantify risks. Creation and refactoring of code and tools.
- 2021/04-11 **ML Engineer (internship), OpenClassrooms (Lille, remote)**
Autonomous management of various real business cases, mentored with weekly reports, versioned code, and presentations to a jury.
- 2019 - 2020 **DevOps Engineer, Alpha Conseils (Paris)**
Implementing and automation of the coding environment for an internal project. Coding a web application within a team with Agile method.
- 2013 - 2017 **PhD Student, INS - INSERM (Marseille)**
Study of multiple stability in large-scale modeling of brain activity and comparative analysis of dynamic functional connectivity between epileptic patients and controls. Development of a proprietary simulator and tools for processing and analyzing time series from functional MRIs and numerical simulations.
- 2013/01-08 **Assistant Engineer, INS**
Creation and study of a published dynamic model. Creation of a machine learning model of activity configurations for clustering.

Education

- 2019/05-08 **Training « DevOps Engineer » – EduGroupe (Paris)**
2012 **Master in Scientific Modeling and Calculation – Rennes1**
2010 **Bachelor in Fundamental Physics – Lille1**
2008 **Technical Degree in Physical Measurements – Maubeuge**
